

Modem auf Fabrikeinstellung „reseten“

1. Eingabe: 192.168.100.1

2. auf Konfiguration klicken, dann Reset all Defaults, dann auf Save change und zuletzt

3. Wieder auf Modem gehen. Bei Frequency Plan auf Europa Standard stellen. Upstream Channel auf 0 und Frequenz auf 127750000 stellen. Anschliessen auf Save

Resting the cable modem to its factory default configuration will remove all stored parameters learned by the cable modem during prior initializations. The process to get back online from a factory default condition could take from 5 to 30 minutes. Please reference the cable modem user manual for details on the power up sequence.

configurable settings of the Cable Modem

Frequency Plan: North American Standard/HRC/IRC

Upstream Channel ID: 2

Frequency (Hz): 127750000

Enable DHCP Server

The SURFboard cable modem can be used as a gateway to the Internet for a machine that can be dynamically assigned IP addresses by the Cable Modem DHCP Server. The assigned IP addresses for other devices on the LAN should be chosen from outside
